**Botros Rizk : Ovarian Hyperstimulation Syndrome: Epidemiology, Pathophysiology, Prevention and Management** before purchasing it in order to gage whether or not it would be worth my time, and all praised Ovarian Hyperstimulation Syndrome: Epidemiology, Pathophysiology, Prevention and Management:

Ovarian Hyperstimulation Syndrome (OHSS) is a condition that can occur in women undergoing in vitro fertilization, after having follicle stimulation hormone (FSH) injections to stimulate egg growth and maturation. Some patients respond excessively to the drug and dose given and moderate to severe OHSS requires admission to a hospital. Botros Rizk, one of the world's top experts on managing OHSS, reviews in depth the important classification, epidemiology, pathophysiology, complications and prediction, prevention and treatment options for this pathology. This book is intended for infertility specialists, reproductive medicine specialists and assisted reproduction specialists.

'... this is a good summary of the current evidence on ovarian hyperstimulation and it should be available to all who stimulate ovaries for assisted conception.' The Obstetrician Gynaecologist  
About the Author Botros Rizk is Professor and Chief, Division of Reproductive Endocrinology and Infertility, Department of Obstetrics and Gynecology at the University of South Alabama School of Medicine.
