**Bettie M. Steinberg, Janet L. Brandsma : Papillomaviruses (Cancer Cells)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Papillomaviruses (Cancer Cells):

Studies on the papillomaviruses have expanded markedly due to the availability of recombinant reagents and in vitro systems and to the recognition of the strong association of specific papillomaviruses with certain carcinomas in humans. This book addresses molecular aspects of the viruses in both transformation and replication and also discusses several features of the molecular epidemiology of the human papillomaviruses.
