Mary V. Burns : Pathophysiology: A Self-Instructional Program before purchasing it in order to gage whether or not it would be worth my time, and all praised Pathophysiology: A Self-Instructional Program:

0 of 0 people found the following review helpful. goodBy Sarahgood1 of 1 people found the following review helpful. Pathophysiology: A Self-Instructional ProgramBy nurse_deThis book is very helpful for anyone studying Pathophysiology. I only wish there was a more recent edition as some of the information on genetics is outdated.

This unique, introductory pathophysiology book covers how the disease process manifests itself in the human body, as well as common diseases of major organs and all body systems. Written in a self-study format, material is presented in frames which allow students to interact with the text. Review throughout the book and questions at the end of each section reinforce the material. A self-test is also included to help students evaluate their grasp of the material.

Pharmacy students, physical therapy students, chiropractic students and other health profession students taking a human disease course.

From the Back Cover
Key Benefit: This unique, introductory pathophysiology book covers how the disease process manifests itself in the human body, as well as common diseases of major organs and all body systems. **Key Topics:** Written in a self-study format, material is presented in frames which allow students to interact with the text. Throughout the book and questions at the end of each section reinforce the material. A self-test is also included to help students evaluate their grasp of the material. **Market:** Pharmacy students, physical therapy students, chiropractic students and other health profession students taking a human disease course.
