**Patricia Metting, James Kleshinski : Physiology: PreTest Self-Assessment and Review, Thirteenth Edition (PreTest Basic Science)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Physiology: PreTest Self-Assessment and Review, Thirteenth Edition (PreTest Basic Science):

0 of 0 people found the following review helpful. HappyBy CustomerIt was exact as described and came on time1 of 1

people found the following review helpful. Saved me in Systems Physiology. By Elizabeth Nguyen While it was more geared towards higher level physio/patho, it was a great prep for Systems Phys exams. Definitely going to use it for my higher level patho classes. 0 of 0 people found the following review helpful. Great service By Saolisa The product came as expected no hassle at all.

PreTest is the closest you can get to seeing the test before you take it! "I like the High-Yield section in the beginning of the book. It's a nice and quick review yet at the same time is thorough and includes the truly high-yield things to know for boards and class." -- Sheree Perron, Third Year Medical Student, Eastern Virginia Medical School "I found Pretest Physiology to follow fairly closely with my experience with the USMLE Step 1 as far as question structure and depth of the material covered. The most basic and most commonly tested questions in physiology in each system were addressed as well as some of the finer details students still need to know." -- Daniel Marcovici, Third Year Medical Student, Sackler School of Medicine, Tel Aviv University Great for course review and the USMLE Step 1, PreTest asks the right questions so you'll know the right answers. You'll find 500 USMLE-type questions and answers along with complete explanations of correct and incorrect answers. The content has been reviewed by students who recently passed their exams, so you know you are studying the most relevant and up-to-date material possible. No other study guide targets what you really need to know in order to pass like PreTest! Content that covers all the must-know topics: General Principles: Cellular Physiology, General Principles: Multisystem Processes, Physiology of the Hematopoietic and Lymphoreticular Systems, Neurophysiology, Musculoskeletal Physiology, Respiratory Physiology, Cardiovascular Physiology, Gastrointestinal Physiology, Renal and Urinary Physiology, Reproductive Physiology, Endocrine Physiology

About the Author Patricia J. Metting, PhD Professor, Departments of Physiology Pharmacology and Medicine Vice Provost and Associate Dean for Student Affairs The University of Toledo College of Medicine Toledo, OH James F. Kleshinski, MD Associate Professor, Department of Medicine Associate Dean for Admissions The University of Toledo College of Medicine Toledo, OH.
