From Lippincott Williams Wilkins : Physiology, Stress, and Malnutrition: Functional Correlates, Nutritional Intervention before purchasing it in order to gauge whether or not it would be worth my time, and all praised Physiology, Stress, and Malnutrition: Functional Correlates, Nutritional Intervention:

This text, based on the proceedings of the third Clintec International Horizons Conference, offers a panoramic view of

the effects of nutrition on the human body. An international array of multidisciplinary researchers present their scientific and clinical studies, and discuss results with researchers from divergent but related fields. The editors' aim is to strengthen scientific direction, propel a more rapid incorporation of technical and clinical advances into patient care, and directly improve nutritional care for the critically ill. Coverage includes: human energy metabolism; energy stores and energy balance with focus on the cellular mechanisms; organ systems; the role of nutrition in organ failure; nutritional support strategies; whole body metabolism; and the challenging issues of whole body outcome measures.
