Carol Porth RN MSN PhD : PrepU for Porth's Essentials of Pathophysiology before purchasing it in order to gauge whether or not it would be worth my time, and all praised PrepU for Porth's Essentials of Pathophysiology:

Higher learning is a scam By Customer Total rip off. The book reps mislead my program on what was included with their book. So we (the students) were forced to buy a \$300 book thinking the access code in that provided access to prepU (no reason it shouldn't) but ended up having to spend an additional \$180 for prepU just to do homework. This is flat out extortion. We shouldn't have to pay hundreds of dollars just to be able to do graded assignments.

Adaptive Learning | Powered by PrepU provides students with the practice they want and need at their own pace and based on their level of understanding. The adaptive nature of PrepU means that each student's experience is personalized and different so their study time is more effective and efficient, and their retention of course material and success rates increase. Instructors will have a better window into their student's performance at the individual and class level so they can identify at-risk students earlier in the course and monitor each student's progress, strengths, and weaknesses. PrepU is a formative assessment, adaptive learning system geared to help students learn and retain course material as they progress. It provides a way for students and instructors to adjust teaching and learning as they are happening.
