Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely  
what they need, when they need it, how they need it, so that your class time is more engaging and effective. The author  
team of Prescott's Microbiology continues the tradition of past editions by providing a balanced, comprehensive  
introduction to all major areas of microbiology. This balance makes Microbiology appropriate for microbiology

majors and mixed majors courses. The authors have introduced a number of pedagogical elements designed to facilitate student learning. They also remain focused on readability, artwork, and the integration of several key themes (including evolution, ecology and diversity) throughout the text, making an already superior text even better.

**About the Author** John Harley teaches Anatomy Physiology and General Biology at Eastern Kentucky University, Richmond, KY and is also co-author of Prescott/Harley/Klein Microbiology and the ASM Microbial Telecourse Study Guide.
