From Elsevier Science : Protein Mass Spectrometry, Volume 52 (Comprehensive Analytical Chemistry) before purchasing it in order to gage whether or not it would be worth my time, and all praised Protein Mass Spectrometry, Volume 52 (Comprehensive Analytical Chemistry):

0 of 0 people found the following review helpful. Best massspectrometry book I have ever readBy Balakumar ThangarajIts a must have for a person who want to get into proteomics field or who want to understand different mass spectrometry techniques.The editor/authors have done a great job of simplifying the complex concepts and different

chapters are presented in a way, so easy to understand and slowly build the reader to understand the advanced mass spectrometry techniques, current challenges and different way to solve those challenges. I thoroughly enjoyed reading it and understood the complex concepts lingered with me. Trust me I have gone through other mass spectrometry books, this is the best book I have come across. Its an valuable addition to my personal library. I would definitely recommend it to anyone. Go and get this book!!!!

This book is designed to be a central text for young graduate students interested in mass spectrometry as it relates to the study of protein structure and function as well as proteomics. It is a definite must-have work for:- libraries at academic institutions with Master and Graduate programs in biochemistry, molecular biology, structural biology and proteomics- individual laboratories with interests covering these areas - libraries and individual laboratories in the pharmaceutical and biotechnology industries. *Serves as an essential reference to those working in the field* Incorporates the contributions of prominent experts *Features comprehensive coverage and a logical structure

"I found the volume 52 of the Comprehensive Analytical Chemistry series (D. Barcel, Editor) entitled Protein Mass Spectrometry and edited by J. P. Whitelegge to be a current, informative, and interesting publication. I recommend this book both to colleagues, who study proteins and have questions, and to fellow mass spectrometrists for whom looking for answers is a favorite past time."--Journal of the American Society for Mass Spectrometry
