Juzar Ali, Warren R. Summer, Michael G. Levitzky : Pulmonary Pathophysiology before purchasing it in order to gage whether or not it would be worth my time, and all praised Pulmonary Pathophysiology:

Incorporates clinical examples and treatment algorithms to reinforce the clinical relevance of abnormal pulmonary physiology. Correlates presenting symptoms with the pathologic aspects of lung dysfunction. Decision trees and clinical examples conclude each chapter and give the student, resident, or practitioner a remarkably practical

description of pulmonary disease and the disease processes responsible for their clinical presentation.

About the Author Associate Professor of Clinical Medicine Section of Pulmonary/Critical Care Medicine Louisiana State University Health Sciences Center New Orleans, LA Howard A. Buchner Professor and Section Chief Director, Pulmonary Services Chief, Pulmonary Services Section of Pulmonary/Critical Care Medicine Louisiana State University Health Sciences Center New Orleans, LA
