**Helen Kreuzer, Adrienne Massey : Recombinant DNA and Biotechnology: A Guide for Students** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Recombinant DNA and Biotechnology: A Guide for Students:

This is the first 'how-to' teaching text for undergraduate students in biotechnology and molecular biology. Both a reference text and a laboratory manual, the book is written in a clear and simple style and is divided into lesson and classroom modules. No other book is available that makes teaching and learning 'the new biology' as compelling and engaging as this new text
