### **Cinnamon VanPutte, Jennifer Regan, Andrew F. Russo Dr. : Seeley's Essentials of Anatomy and Physiology**

before purchasing it in order to gage whether or not it would be worth my time, and all praised Seeley's Essentials of Anatomy and Physiology:

0 of 0 people found the following review helpful. great bookBy sporkpakgreat book0 of 0 people found the following review helpful. Good serviceBy Laura SalernoCan't beat a \$20 rental! Just great!0 of 0 people found the following review helpful. Great bookBy ibemrsteveVery good book and learning a lot

Designed for the one-semester course, Seeley's Essentials of Anatomy and Physiology is written to allow instructors the ability to accomplish one overall goal: to teach the basics of AP while fostering the skill of problem solving. Through learning how to solve problems and think critically, students learn AP based on two themes: the relationship between structure and function, and homeostasis. Users who purchase Connect Plus receive access to the full online ebook version of the textbook, as well as SmartBook.

About the Author Cinnamon L. VanPutte has been teaching biology and human anatomy and physiology for almost two decades. At Southwestern Illinois College she is a full-time faculty member and the coordinator for the anatomy and physiology courses. Cinnamon is an active member of several professional societies, including the Human Anatomy Physiology Society (HAPS). Her Ph.D. in zoology, with an emphasis in endocrinology, is from Texas AM University. She worked in Dr. Duncan MacKenzies lab, where she was indoctrinated in the major principles of physiology and the importance of critical thinking. The critical thinking component of Seeleys Essentials of Human Anatomy Physiology epitomizes Cinnamons passion for the field of human anatomy and physiology; she is committed to maintaining this tradition of excellence. Cinnamon and her husband, Robb, have two children: a daughter, Savannah, and a son, Ethan. Savannah is very creative and artistic; she loves to sing, write novels, and do art projects. Robb and Ethan have their black belts in karate and Ethan is one of the youngest black belts at his martial arts school. Cinnamon is also active in martial arts and is a competitive Brazilian Jiu-Jitsu practitioner. She has competed at both the Pan Jiu-Jitsu Championship and the World Jiu-Jitsu Championship. Andrew F. Russo has over 20 years of classroom experience with human physiology, neurobiology, molecular biology, and cell biology courses at the University of Iowa. He is a recipient of the Collegiate Teaching Award and is currently the course director for Medical Cell Biology and Director of the Biosciences Graduate Program. He is also a member of several professional societies, including the American Physiological Society and the Society for Neuroscience. Andrew received his Ph.D. in biochemistry from the University of California at Berkeley. His research interests are focused on the molecular neurobiology of migraine. His decision to join the author team for Seeleys Essentials of Human Anatomy Physiology is the culmination of a passion for teaching that began in graduate school. He is excited about the opportunity to hook students interest in learning by presenting cutting-edge clinical and scientific advances. Andy is married to Maureen, a physical therapist, and has three daughters Erilynn, Becky, and Colleen, now in college and graduate school. He enjoys all types of outdoor sports, especially bicycling, skiing, ultimate Frisbee and, before moving to Iowa, bodyboard surfing. For over ten years, Jennifer L. Regan has taught introductory biology, human anatomy and physiology, and genetics at the university and community college level. She has received the Instructor of the Year Award at both the departmental and college level while teaching at USM. In addition, she has been recognized for her dedication to teaching by student organizations such as the Alliance for Graduate Education in Mississippi and Increasing Minority Access to Graduate Education. Jennifer has dedicated much of her career to improving lecture and laboratory instruction at her institutions. Critical thinking and lifelong learning are two characteristics Jennifer hopes to instill in her students. She appreciates the Seeley approach to learning and is excited about contributing to further development of the textbook. She received her Ph.D. in biology at the University of Houston, under the direction of Edwin H. Bryant and Lisa M. Meffert. She is an active member of several professional organizations, including the Human Anatomy and Physiology Society. During her free time, Jennifer enjoys spending time with her husband, Hobbie, and two sons, Patrick and Nicholas.
