**David Weedon AO MD FRCPA FCAP(Hon) : Skin Pathology, 2e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Skin Pathology, 2e:

2 of 2 people found the following review helpful. An excellent buyBy Dr. Flix P. ArceThis is, in my opinion THE BOOK for a pathologist dealing with dermatopathology. The writing is clear and crisp and I appreciate the morphologically-oriented classifications, instead of the more common admixture of ethiologic, morphologic and topographic attempts of classification, many of the categories meaning little to the morphologist.0 of 0 people found the following review helpful. well worth the priceBy J. B. StrickerI bought the first edition as a resident and carried it with me everywhere. I bought 2 of the second edition- one for home and one for work. It never has even seen the

bookshelf as I generally have it on my desk next to the microscope at all times. Yes, it really is that good. 0 of 0 people found the following review helpful. the bible of skin pathology By Dr. Daniela Karimian-teherani Weedon's book is one of the best and completest collections in the world concerning dermatopathology. it gives a good overview about nearly all possible skin diseases and show a lot of photos even of rare cases. Therefore one has to have if one works with skin pathology--sort of bible. can be recommended to dermatologists as well as they are supposed to know histology a little bit for the diagnosis.

Thoroughly revised and updated, this comprehensive, authoritative reference will help both the experienced and novice practitioner diagnose skin diseases and disorders more accurately and effectively. A superb full colour art program illustrating both neoplastic and non-neoplastic conditions will help the clinician easily interpret key clinical and diagnostic points.

About the Author David Weedon, MD FRCPA, Royal Brisbane Hospital, Brisbane, Australia
