Daniel R. Marshak : Stem Cell Biology (Cold Spring Harbor Monograph Series, 40) before purchasing it in order to gage whether or not it would be worth my time, and all praised Stem Cell Biology (Cold Spring Harbor Monograph Series, 40):

Johns Hopkins Univ., Baltimore, MD. Discusses the progress in this field of research. Based on two small meetings held at the Banbury Center of Cold Spring Harbor Laboratory in 1996 and 1999. Includes general issues, early development, mesoderm, ectoderm, and endoderm.

"...very good book for newcomers to stem-cell biology and for experts looking for new ideas by broadening their perspective..." -- Nature
