**Leslie P. Gartner : Textbook of Histology, 4e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Textbook of Histology, 4e:

0 of 1 people found the following review helpful. Five StarsBy Jwohua leeGood book

Thoroughly updated to reflect all of the latest concepts and advances in the field, this concise, extensively illustrated text presents the basic science and clinical application of cellular and molecular biology. Functioning as a combined text and atlas, it is essentially two books for the price of one providing a comprehensive, visually engaging histology education from the ground up. Illustrations, tables, PowerPoint presentations, chapter summaries and multiple choice questions facilitate comprehension of concepts, and clinical correlations underscore the practical relevance of the material. Superb illustrations including photomicrographs, electron micrographs, schematic diagrams and drawings provide a visual grasp and easier retention of difficult concepts. Online PowerPoint slides, prepared by the author, offer a convenient way to review the most essential information from the text. Clinical correlations throughout

the text demonstrate clinical applications and reinforce the idea that histology is pertinent not only to pathology and physiology, but in fact comprises one of the essential bases of clinical practice. New! "Pathological Considerations" section at the end of each chapter. Helpful tables provide an at-a-glance summary statement of key points. Bolded key terms, bulleted lists and chapter summaries emphasize the "need to know" information in every chapter. A combination of USMLE-style questions and image based questions in each chapter. Student Consult eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, and references from the book on a variety of devices.

"This is a high quality book that would serve any graduate biomedical students well. Although there are one or two other similar books, what makes this one stand out is the balance between text and images. It is complete without becoming too overly detailed." -George K. Niiro, PhD (Midwestern University) for Doodys Service

About the Author: Leslie P. Gartner is Professor of Anatomy in the Department of Biomedical Sciences at the Dental School of the University of Maryland. He has received numerous teaching awards and is the author of "Essentials of Oral Histology and Embryology," "3rd Edition" (1999), "Oral Histology and Embryology," "2nd Edition" (1999) as well as the coauthor of the well-respected "Textbook of Head and Neck Anatomy," "3rd Edition," with James L. Hiatt (2001), and coauthor of the "Color Textbook of Histology, 2nd Edition" (2001) and the "Color Atlas of Histology, 4th Edition" (2005) also with James L. Hiatt. The atlas, which is used by almost half the US medical schools, has been translated into eight languages. He also coauthored "Cell Biology and Histology, 4th Edition" (2003) with James L. Hiatt and Judy M. Strum and is the Histology consultant to "Stedman's Medical Dictionary, 28th Edition" (2006).
