Malcolm P. Young, Jack W. Scannell, Gully Burns : The Analysis of Cortical Connectivity (Neuroscience Intelligence Unit) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Analysis of Cortical Connectivity (Neuroscience Intelligence Unit):

This book is about the patterns of connections between brain structures. It reviews progress on the analysis of

neuroanatomical connection data and presents six different approaches to data analysis. The results of their application to data from cat and monkey cortex are explored. This volume sheds light on the organization of the brain that is specified by its wiring.
