Ronald A. Asherson : The Antiphospholipid Syndrome before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Antiphospholipid Syndrome:

Written by the foremost researchers in the field, this book gathers together in a single source the many important clinical associations of antiphospholipid antibodies. Antibody-related clotting mechanisms and their relationship to conditions such as recurrent strokes, chorea, multi infarct dementias, a variety of spinal syndromes, Addison's Disease,

recurrent miscarriages, and many more are discussed in depth. The importance of these antibodies in 'Primary,' 'Secondary,' and 'Catastrophic' Antiphospholipid Syndrome is highlighted. Each chapter is devoted to a specific internal system and the clinical effects this syndrome has on that system. This authoritative book is an essential addition to medical libraries as well as an invaluable reference for general physicians, internists, rheumatologists, neurologists, cardiologists, nephrologists, endocrinologists, gastroenterologists, pulmonologists, dermatologists, and obstetricians.
