**Bruce H. Lipton Ph.D. Ph.D. : The Biology of Belief 10th Anniversary Edition: Unleashing the Power of Consciousness, Matter Miracles** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Biology of Belief 10th Anniversary Edition: Unleashing the Power of Consciousness, Matter Miracles:

2 of 2 people found the following review helpful. I enjoyed it, but have a science background  
By DanielleVery interesting concepts and a way to view interrelatedness of all things. I enjoyed it, but have a science background. It may be a little too technical for some, but the explanations and way that it is written makes these concepts as simple as they can be. Great read, but I would have liked the second part on applying these concepts to life to be longer and more explanatory.  
0 of 0 people found the following review helpful. Biology ,DNA , Epigenetics ,Consciousness  
By wagExcellent book . 10th anniversary edition with updates included in each chapter . It makes the argument that we are more than what our DNA programs us to be. It questions Newtonian physics / science and Darwinian Genetics/ Evolution and demonstrates examples of adaptations made by organisms as a result of different stimuli , interactions , and changes in consciousness .

By Luz Leida DiazIn language anyone can understand the author explains how our belief system affects our lives. They activate the expression of our genes. When we change our programming we can help ourselves and consciously evolve we are no longer helpless victims of "fate" or inherited traits.

This 10th-anniversary edition of Bruce Lipton's best-selling book *The Biology of Belief* has been updated to bolster the book's central premise with the latest scientific discoveries and there have been a lot in the last decade. *The Biology of Belief* is a groundbreaking work in the field of new biology. Former medical school professor and research scientist Bruce H. Lipton, Ph.D., presents his experiments, and those of other leading-edge scientists, which examine in great detail the mechanisms by which cells receive and process information. The implications of this research radically change our understanding of life, showing that genes and DNA do not control our biology; instead, DNA is controlled by signals from outside the cell, including the energetic messages emanating from our positive and negative thoughts. This profoundly hopeful synthesis of the latest and best research in cell biology and quantum physics has been hailed as a major breakthrough, showing that our bodies can be changed as we retrain our thinking.

The long sought after missing link between life and consciousness; *The Biology of Belief* will become a cornerstone for the science of the new millennium. Gregg Braden  
About the Author  
Bruce H. Lipton, Ph.D., cell biologist and lecturer, is an internationally recognized leader in bridging science and spirit. Bruce was on the faculty of the University of Wisconsin School of Medicine and later performed groundbreaking stem-cell research at Stanford University. He is the best-selling author of *The Biology of Belief*, *The Honeymoon Effect*, and *Spontaneous Evolution*. In 2009, Bruce received the prestigious Goi Peace Award (Japan) in honor of his scientific contribution to world harmony. Website: [www.bruce-lipton.com](http://www.bruce-lipton.com)
