3 of 3 people found the following review helpful. Best Eye Images Ever!By Mike RothschildAs an optometrist, I always want my patients to understand what is going on with their eyes. I have used every picture, diagram and computerized image of the eyes out there and this one is simply the best. Everything you want to talk about with a patient is represented on the poster in an easy to understand view. The adnexa, the lids in cross section, the extraocular muscles, the ciliary body, the lens, the retina - everything. There is even a detailed view of the trabecular meshwork

and layers of the retina. I now have the identical chart in every room in the office. Mike Rothschild, OD 2 of 2 people found the following review helpful.
