Details of the angelic management of etheric formative forces, in the creation of a new body, for a soul to inhabit By Healing Toolbox A classic of Theosophy still 10% relevant in 2015. One of very few Theosophical books still easy to read today. He details the angelic management of etheric formative forces in the creation of a new body for a soul to inhabit. Fascinating. A strikingly scientific look at a topic often addressed in flimsy new Age rhetoric. Much Theosophical literature has dated significantly. We know why this is. When it was written, the most progressive paradigm at the time was the "Sherlock Holmes" intellectual mind. By 1970 the progressive paradigm evolved significantly. Somewhere between 1985 and 2005, the new progressive paradigm became the 'heart-felt experience,' a more balanced expression of both left and right brain capacities. Be that as it may, most of Hodson's books and this one in particular, remain contemporary in their classic method of objective observation, attention to physical detail and humanness of outlook. If you like this book, don't miss his Kingdom of the Gods.
