Sarah Wagner : To Know Where He Lies: DNA Technology and the Search for Srebrenicas Missing before purchasing it in order to gage whether or not it would be worth my time, and all praised To Know Where He Lies: DNA Technology and the Search for Srebrenicas Missing:

1 of 2 people found the following review helpful. Strong post-modernist, feminist approach to Croatian genocideBy The ArchaeologistWagner's book provides a strong feminist, post-modernist analysis of the Croatian (Bosniak)

genocide. Her arguments are centered around the experiences of the women who were 'left behind' following the execution of their male relatives. It is a well-written, moving piece of ethnography. Still, it is accessible for non-academic readers as well. Her presentation is grounded in theory, but it is quite readable and 'user friendly'. 0 of 0 people found the following review helpful. Wagner has provided a wonderful history of the genocide in Bosnia By R. Evans Dr. Wagner has provided a wonderful history of the genocide in Bosnia. 0 of 6 people found the following review helpful. the seller is very good By Husky with a high quality, the seller keeps this book so well. However, this book is not worth reading since the content of it is too academic. Anyway, I am much appreciated.

In the aftermath of the 1992-1995 Bosnian war, the discovery of unmarked mass graves revealed Europe's worst atrocity since World War II: the genocide in the UN "safe area" of Srebrenica. *To Know Where He Lies* provides a powerful account of the innovative genetic technology developed to identify the eight thousand Bosnian Muslim (Bosniak) men and boys found in those graves and elsewhere, demonstrating how memory, imagination, and science come together to recover identities lost to genocide. Sarah E. Wagner explores technology's import across several areas of postwar Bosnian society for families of the missing, the Srebrenica community, the Bosnian political leadership (including Serb and Muslim), and international aims of social repair probing the meaning of absence itself.

From the Inside Flap "Wagner provides a remarkable analysis of a deeply disturbing subject and offers her own powerful contribution to the multi-layered efforts to identify and recognize Srebrenica's victims including not just those who were killed but also the relatives left behind." Pamela Ballinger, author of *History in Exile: Memory and Identity at the Borders of the Balkans* "To Know Where He Lies forces the legal community to think about identification for families as opposed to evidence collection; the scientific community to look beyond technology and statistics; the international community to acknowledge accountability; and the public to examine its attitudes toward genocide by personalizing loss." Dr. Harvey Weinstein, University of California, Berkeley
