before purchasing it in order to gauge whether or not it would be worth my time, and all praised To Members of Parliament and Others. Forty-five Years of Registration Statistics, Proving Vaccination to be Both Useless and Dangerous:

0 of 0 people found the following review helpful. One StarBy Michael for the price it is crap

This early work by Alfred Russel Wallace was originally published in 1893 and we are now republishing it with a brand new introductory biography. 'To Members of Parliament and Others. Forty-five Years of Registration Statistics, Proving Vaccination to be Both Useless and Dangerous' is a letter in which Wallace outlines his reasons for being concerned about the use of vaccinations. Alfred Russel Wallace was born on 8th January 1823 in the village of Llanbadoc, in Monmouthshire, Wales. Wallace was inspired by the travelling naturalists of the day and decided to begin his exploration career collecting specimens in the Amazon rainforest. He explored the Rio Negro for four years, making notes on the peoples and languages he encountered as well as the geography, flora, and fauna. While travelling, Wallace refined his thoughts about evolution and in 1858 he outlined his theory of natural selection in an article he sent to Charles Darwin. Wallace made a huge contribution to the natural sciences and he will continue to be remembered as one of the key figures in the development of evolutionary theory.
