From Ingramcontent : **Translating MicroRNAs to the Clinic** before purchasing it in order to gage whether or not it would be worth my time, and all praised Translating MicroRNAs to the Clinic:

Translating microRNA to the Clinic reviews the possibilities of current methodological tools and experimental approaches used by leading translational researchers. The book features the uses of micro ribonucleic acid as deployed in cancer targeting in biomarkers, diabetes, cardiovascular disease, and neurodegeneration, among many others. Pedagogically, the work concentrates on the latest knowledge, laboratory techniques, and experimental approaches used by translational research leaders in this field, promoting a cross-disciplinary communication between the sub-specialities of medicine, but in common with other books on the topic. In addition, the book emphasizes recent innovations, critical barriers to progress, the new tools that are being used to overcome them, and specific areas of

research that require additional study to advance the field as a whole. Encompasses the latest innovations and tools being used to apply microRNA from lab to clinic

About the Author Dr Laurence is pursuing the pathophysiology of cardiovascular and skeletal abnormalities linked to HIV disease and its therapies at Weill Cornell. Dr Laurence is the editor-in-chief of Translational Medicine, which Elsevier co-publishes with the CSCTR.
