**Richard A. Watts, David G. I. Scott, Chetan Mukhtyar : Vasculitis in Clinical Practice** before purchasing it in order to gage whether or not it would be worth my time, and all praised Vasculitis in Clinical Practice:

0 of 0 people found the following review helpful. Four StarsBy Terry59An excellent reference book

This book focuses on clinical presentation, diagnostic processes and current management of systematic vasculitis, and for this second edition the Editors have updated the treatment approach and nomenclature in line with current practice. Systemic vasculitides are a group of disorders which are of increasing importance. Many of these conditions are only rarely encountered by general physicians and often present significant diagnostic challenges. The Editors aim to provide easily accessible information in a pocket sized format. In doing so they hope to help both the generalist but also rheumatologists who only encounter these problems occasionally.

'This is a wonderful and comprehensive overview of vasculitis treatment, the most common vasculitic disorders, and its mimics...in a way that is useful to both primary care providers and specialists...It is useful for the initial evaluation of patients with suspected vasculitis. There are few books on this subject with such in-depth information.' 4 Stars Doody .From the Back CoverIn this second edition, the authors discuss the newly discovered entity of IgG4 related diseases, look in greater detail at the role of biologic treatment in ANCA associated vasculitis, and have revised the nomenclature in each chapter to reflect international consensus. The addition of illustrations as well as online video content helps the reader manage patients with these potentially devastating conditions. Vasculitis in Clinical Practice, Second Edition, is a useful and concise volume that will help physicians in training, primary care physicians and nurse practitioners in quickly and easily recognizing the key and salient points of each condition. About the Author Richard A. Watts is a Senior Lecturer at the University of East Anglia School of Medicine, Health and Policy Practice and a Consultant Rheumatologist at Ipswich Hospital NHS Trust, in the UK. David G.I. Scott is a Consultant Rheumatologist at Norfolk and Norwich University Hospital NHS Trust, and an Honorary Professor at the University of East Anglia, School of Medicine, Health Policy and Practice, in the UK. Chetan Mukhtyar is a consultant rheumatologist at the Norfolk and Norwich University Hospital. His other roles include Honorary Senior Lecturer at Norwich Medical School, Regional BSR chair for East of England, Secretary of East Anglia Rheumatology Society, Rheumatology rep on MRCP Part 2 Exam Board.
