Ellen W. Cutler : Winning the War Against Immune Disorders and Allergies before purchasing it in order to gauge whether or not it would be worth my time, and all praised Winning the War Against Immune Disorders and Allergies:

51 of 52 people found the following review helpful. Excellent By A Customer A highly intelligent overview of many illness that are directly or indirectly connected to allergies. What struck me most was the way the author shows a truly deep understanding of the complex causes of each illness and yet offers meaningful treatment options. It should be

noted that the book is primarily intended as an introduction (though it goes further than any introduction) to using NAET - a particular type of allergy desensitisation. NAET is quite revolutionary in its approach and the combination of insight into disease and intelligent treatment options makes this book a winner for anyone with immune disorders. So much more sophisticated (though easy to understand) than the vast majority of books on immune disorders/allergies out there.50 of 53 people found the following review helpful. A necessity for anyone with allergies or immune disordersBy A CustomerAlthough a bit wordy, Dr. Cutler's book is an necessity for anyone with allergies or immune disorders, especially those undergoing NAET acupuncture therapy. Dr. Cutler supplies numerous case studies, many examples far more severe than the person who reads the book, but helpful when assessing one's condition and also fairly interesting. I have found the book to be an excellent guide when following the protocol for clearing one's self of food allergies along with NAET acupuncture. I also recommend this book to someone who is interested in alternative medicine, or to the person who is considering acupuncture but is timid of undergoing treatment without research beforehand.5 of 5 people found the following review helpful. Buy it, then read it, and you'll never look at your health the same way again!By PattiMKThis is the book that could change your life. Honest. If you suffer from arthritis, allergies, Herpes, are HIV positive, have asthma or CFIDS or any other chronic illness, this book will change the way you look at your health. Western medicine only wants to suppress the symptoms- this book is about cures! So much of what happens within our bodies is due to sensitivities (or allergies) to anything from shellfish to our own hormones. Once those allergies are cured (YES, they can be cured), your no-longer-distracted immune system will be able to act more normally. I am currently being cleared of my allergies (by my acupuncture doctor) using the methods in this book. I was allergic to paper, red wine, animal dander, my DNA, my hormones, smoke, and a whole host of other things. Halfway through the six week process, my weight is dropping and I'm breathing through my nose. And there's still more improvement to come. Read this book, and trust me, your life will change for the better.

An absolute must for any health care practitioners interested in alternative therapies for the treatment of immune disorders and allergies, this book details an innovative and proven breakthrough treatment method, Nambudripad Allergy Elimination Technique (NAET), for the long term elimination of allergies that lead to many immune disorders. Coverage includes: complimentary adjunctive therapies that enhance the benefits of NAET in the elimination of immune disorders symptoms, emergency tips, directory of NAET practitioners and updated NAET diets.
